Volante Multi-Meal meets the needs of not only our food services but also the needs of our students and the National School Lunch Program.

1. User friendly, fast Point of Sale (POS) terminals
2. Complete anonymity for all students on the free and reduced lunch program.
3. Input, view and edit any student on the free and reduced lunch program with a click of the mouse from the back office
4. Meal plan summaries – a quick and great way to make government reimbursement claims
5. State-of-the-art technologies with complete security and account confidentiality.
6. Parent reports are in an easy to read format
7. Easy exporting, continuous synchronization (no more back-up disks ever), a back office management system and more
8. Live technical support – anytime, anywhere

From the first day of installation, we were able to see how and why we had lost money using cash registers and manual reporting. Both lunch and breakfast participation has increased, especially for students participating in the free and reduced lunch program. The return on investment was well worth it.

In the fall of 2004 we received a software upgrade. This made the system even better by getting the students through the lunch lines quicker and making reports easier to understand.

Volante's Technical Support Team is **always** available to speak with you, no matter what time of the day it is.

Susan Davis
Food Service Director
